

# 9.26 TOWN OF LYNDON

This section presents the jurisdictional annex for the Town of Lyndon. It includes resources and information to assist public and private sectors to reduce losses from future hazard events. This annex is not guidance of what to do when a disaster occurs. Rather, this annex concentrates on actions that can be implemented prior to a disaster to reduce or eliminate damage to property and people. This annex includes a general overview of the municipality and who in the town participated in the planning process; an assessment of the Town of Lyndon's risk and vulnerability; the different capabilities utilized in the town; and an action plan that will be implemented to achieve a more resilient community.

# 9.26.1 Hazard Mitigation Planning Team

The following individuals have been identified as the Town of Lyndon's hazard mitigation plan primary and alternate points of contact.

### Table 9.26-1. Hazard Mitigation Planning Team

## 9.26.2 Municipal Profile

The Town of Lyndon lies on the eastern border of Cattaraugus County in western New York State. The Town of Lyndon has a total area of 33.27 square miles. Gates Creek is a stream that flows out the west town line and Oil Creek is a stream by the east town line. The town is bordered to the north by the Town of Farmersville, the east border is formed by New Hudson in Allegany County, west by the Town of Franklinville, and south by Town of Ischua.

There are two hamlets located within the town: Elgin and Rawson. The estimated 2018 population was 696, a 1.56 percent decrease in population from 2010 (707 persons).

Data from the 2018 U.S. Census American Community Survey indicate that 5.5 percent of the town population is 5 years of age or younger and 15.9 percent is 65 years of age or older. Communities must deploy a support system that enables all populations to safely reach shelters or to quickly evacuate a hazard area.

#### **History and Cultural Resources**

The Town of Lyndon was first settled in 1806 and founded in 1829 from a portion of the Town of Franklinville. The North Lyndon Schoolhouse is listed on the National Register of Historical Places.

### 9.26.3 Growth/Development Trends

Understanding how past, current, and projected development patterns have or are likely to increase or decrease risk in hazard areas is a key component to understanding a jurisdiction's overall risk to its hazards of concern.

Table 9.26-2 summarizes recent and expected future development trends, including major residential/commercial development and major infrastructure development. Figure 9.26-1 at the end of this annex illustrates the geographically delineated hazard areas and the location of potential new development, where available.

# 9.26.4 Capability Assessment

The Town of Lyndon performed an inventory and analysis of existing capabilities, plans, programs, and policies that enhance its ability to implement mitigation strategies. Section 6.4 (Capability Assessment) describes the components included in the capability assessment and their significance for hazard mitigation planning. This section summarizes the following findings of the assessment:

- An assessment of legal and regulatory capabilities.
- Development and permitting capabilities.
- An assessment of fiscal capabilities.
- An assessment of education and outreach capabilities.
- Information on National Flood Insurance Program (NFIP) compliance.
- Classification under various community mitigation programs.
- The community's adaptive capacity for the impacts of climate change.

For a community to succeed in reducing long-term risk, hazard mitigation must be integrated into the day-to-day local government operations. As part of this planning effort, planning/policy documents were reviewed, and each jurisdiction was surveyed to obtain a better understanding of their progress in plan integration. Areas with current mitigation integration are summarized in Capability Assessment (Section 9.26.4). The Town of Lyndon identified specific integration activities that will be incorporated into municipal procedures are included in the updated mitigation strategy. Appendix H provides the results of the planning/policy document review.

<sup>\*</sup> Only location-specific hazard zones or vulnerabilities identified.

# Planning, Legal, and Regulatory Capability

The table below summarizes the regulatory tools that are available to the Town of Lyndon and where hazard mitigation has been integrated.

Table 9.26-3. Planning, Legal, and Regulatory Capability

# **Fiscal Capability**

The table below summarizes financial resources available to the Town of Lyndon.

**Table 9.26-6. Fiscal Capabilities** 

| Financial Resources   | Accessible or Eligible to Use<br>(Yes/No) |  |  |
|---|---|--|--|
| Community development Block Grants (CDBG, CDBG-DR)                | No  |  |  |
| Capital improvements project funding                              | No  |  |  |
| Authority to levy taxes for specific purposes                     | Yes                                       |  |  |
| User fees for water, sewer, gas or electric service               | No  |  |  |
| Impact fees for homebuyers or developers of new development/homes | No  |  |  |
| Stormwater utility fee  | No  |  |  |
| Incur debt through general obligation bonds                       | Yes                                       |  |  |
| Incur debt through special tax bonds                              | Yes                                       |  |  |
| Incur debt through private activity bonds                         | Yes                                       |  |  |
| Withhold public expenditures in hazard-prone areas                | No  |  |  |
| Other federal or state Funding Programs                           | No  |  |  |
| Open Space Acquisition funding programs                           | No  |  |  |
| Other   | No  |  |  |

## **Education and Outreach Capability**

The table below summarizes the education and outreach resources available to the Town of Lyndon.

Table 9.26-7. Education and Outreach Capabilities

| Indicate if your jurisdiction has the following resources   | Yes/No; Please describe   |
|---|---------------------------|
| Public information officer or communications office?  | Yes. Supervisor           |
| Personnel skilled or trained in website development?  | No                        |
| Hazard mitigation information available on your website; if yes, describe   | No                        |
| Social media for hazard mitigation education and outreach; if yes, briefly describe.                                    | No                        |
| Citizen boards or commissions that address issues related to hazard mitigation; if yes, briefly describe.               | No                        |
| Other programs already in place that could be used to communicate hazard-related information; if yes, briefly describe. | No                        |
| Warning systems for hazard events; if yes, briefly describe.  | Yes, the State and County |
| Natural disaster/safety programs in place for schools; if yes, briefly describe.  | No                        |
| Other   | No                        |

### **Community Classifications**

The table below summarizes classifications for community programs available to the Town of Lyndon.

**Table 9.26-8. Community Classifications** 

| Program   | Participating?<br>(Yes/No) | Classification (if applicable) | Date Classified (if applicable) |
|---|----------------------------|--------------------------------|---------------------------------|
| Community Rating System (CRS)                           | No                         | -                              | -                               |
| Building Code Effectiveness Grading Schedule (BCEGS)    | Yes                        | Unknown                        | Unknown                         |
| Public Protection (ISO Fire Protection Classes 1 to 10) | Yes                        | Unknown                        | Unknown                         |
| NYSDEC Climate Smart Community                          | No                         | -                              | -                               |
| Storm Ready Certification                               | No                         | -                              | -                               |
| Firewise Communities classification                     | No                         | -                              | -                               |
| Other   | No                         | -                              | -                               |

Note:

### **Adaptive Capacity**

Adaptive capacity is defined as "the ability of systems, institutions, humans and other organisms to adjust to potential damage, to take advantage of opportunities, or respond to consequences" (IPCC 2014). In other words, it describes a jurisdiction's current ability to adjust to, protect from, or withstand a hazard event. This term is often discussed in reference to climate change; however, adaptive capacity also includes an understanding of local capacity for adapting to current and future risks and changing conditions. The table below summarizes the adaptive capacity for each hazard and the jurisdiction's rating.

• The town does not currently have access to resources to determine the possible impacts of climate change upon the municipality and would rely on the county.

#### **Table 9.26-9. Adaptive Capacity**

| Hazard              | Adaptive Capacity (Capabilities) -<br>High/Medium/Low |
|---------------------|---|
| Flood               | Medium  |
| Landslide           | Medium  |
| Severe Storm        | High  |
| Severe Winter Storm | High  |
| Utility Failure     | Medium  |
| Wildfire            | Medium  |

High Capacity exists and is in use

Medium Capacity may exist; but is not used or could use some improvement

Low Capacity does not exist or could use substantial improvement

Unsure Not enough information is known to assign a rating

#### **National Flood Insurance Program**

This section provides specific information on the management and regulation of the regulatory floodplain.

## NFIP Floodplain Administrator (FPA)

The Town of Lyndon's floodplain administrator is Phil Tremblay, the Code Enforcement Officer.

# National Flood Insurance Program (NFIP) Summary

The following table summarizes the NFIP statistics for the Town of Lyndon.

#### Table 9.26-10. NFIP Summary

| Municipality   | # Policies | # Claims<br>(Losses) | Total<br>Loss<br>Payments | # RL<br>Properties |
|----------------|------------|----------------------|---------------------------|--------------------|
| Town of Lyndon | 1          | 0                    | \$0                       | 0                  |

Source: NYS DHES, 2020

RL Repetitive Loss; SRL Severe Repetitive Loss

#### Resources

The town's Code Enforcement Officer is responsible for floodplain management however, there are no certified floodplain managers on staff. The town has access to resources to determine possible future flooding conditions for climate change through DEC. The town's floodplain management staff needs certification training to support its floodplain management program. NFIP administration services is provided by the Code Enforcement The town did not identify any barriers.

#### **Compliance History**

The most recent Community Assistance Visit (CAV) was on May 12, 2009.

### Regulatory

The Town of Lyndon's flood damage prevention ordinance does not meet the requirements because it is outdated and does not include the required freeboard.

## **Additional Areas of Existing Integration**

**Town Website:** The Town of Lyndon's website (<a href="http://lyndontown.org/">http://lyndontown.org/</a>) hosts town information and announcements.

### **Evacuation, Sheltering, Temporary Housing, and Permanent Housing**

Evacuation routes, sheltering measures, temporary housing, and permanent housing must all be in place and available for public awareness to protect residents, mitigate risk, and relocate residents, if necessary, to maintain post-disaster social and economic stability.

#### **Evacuation Routes**

The town identified County roads to State Road 16, 24, 47, 63 as potential evacuation routes to use in the event of an emergency.

## Sheltering

The town identified 828 Fire Department as a potential shelter. It accommodates pets, is ADA compliant, has back up power, and provides basic medical services.

## **Temporary Housing**

The Town of Lyndon did not identify temporary housing locations. Action 2020-Lyndon-007 was created to identify temporary housing locations.

### **Permanent Housing**

The Town of Lyndon did not identify permanent housing locations, but the county identified locations shown in Figure 9.26-1 and

Figure 9.26-2.

# 9.26.5 Hazard Event History Specific to the Town of Lyndon

Cattaraugus County has a history of natural and non-natural hazard events as detailed in Volume I, Section 5 (Risk Assessment) of this plan. A summary of historical events is provided in each of the hazard profiles and includes a chronology of events that have affected the county and its municipalities. The Town of Lyndon's history of federally-declared (as presented by FEMA) and significant hazard events (as presented in NOAA-NCEI) is consistent with that of Cattaraugus County. Table 9.26-11 provides details regarding municipal-specific loss and damages the town experienced during hazard events. Information provided in the table below is based on reference material or local sources. For details of these and additional events, refer to Volume I, Section 5.0 of this plan.

Table 9.26-11. Hazard Event History

| Dates of<br>Event                     | Event Type<br>(Disaster<br>Declaration if<br>applicable)                    | County<br>Designated? | Summary of Event  | Municipal Summary of<br>Damages and Losses                                       |  |  |
|---------------------------------------|---|-----------------------|---|--|--|--|
| October<br>27-<br>November<br>8, 2012 | Hurricane<br>Sandy (FEMA-<br>EM-3351)                                       | Yes                   | Remnants of Hurricane Sandy brought strong winds and heavy rains to western and north central New York. Rainfall amounts of two to five inches were measured across the area with some area creeks reaching bankful. The high winds downed trees and power lines throughout the region. Wind gusts were measured to 60 mph. | Although the county was impacted, the Town of Lyndon did not report any damages. |  |  |
| May 13-<br>22, 2014                   | Severe Storms<br>and Flooding<br>(FEMA-DR-<br>4180)                         | Yes                   | Heavy showers and embedded thunderstorms trained across the western Southern tier. Rainfall amounts of one to three inches in just a few hours resulted in flash flooding across the region. Roads and culverts were washed out. Numerous roads were water-covered and closed.  | Although the county was impacted, the Town of Lyndon did not report any damages. |  |  |
| November<br>17-26,<br>2014            | Severe Winter<br>Storm,<br>Snowstorm, and<br>Flooding<br>(FEMA-DR-<br>4204) | Yes                   | Lake effect snow resulted in heavy snowfall across the region.  | Although the county was impacted, the Town of Lyndon did not report any damages. |  |  |
| July 14,<br>2015                      | Flash Flood   | No                    | Numerous rounds of storms along a stationary cold front resulted in flash flooding. Damaging winds occurred in some areas of the county.  | Although the county was impacted, the Town of Lyndon did not report any damages. |  |  |
| March 8, 2017                         | High Wind   | No                    | A strong low-pressure system brought strong and damaging winds to the entire region.  | Although the county was impacted, the Town of Lyndon did not report any damages. |  |  |

# 9.26.6 Hazard Ranking and Jurisdiction-Specific Vulnerabilities

The hazard profiles in Section 5.0 (Risk Assessment) of this plan have detailed information regarding each plan participant's vulnerability to the identified hazards. The following summarizes the Town of Lyndon's risk assessment results and data used to determine the hazard ranking.

A gradient of certainty was developed to summarize the confidence level regarding the input used to populate the hazard ranking. A certainty factor of high, medium or low was selected and assigned to each hazard to provide a level of transparency and create increased understanding of the data used to support the resulting ranking. The following scale was used to assign a certainty factor to each hazard:

- High—Defined scenario/event to evaluate; probability calculated; evidenced-based/quantitative assessment to estimate potential impacts through hazard modeling.
- Moderate—Defined scenario/event or only a hazard area to evaluate; estimated probability; combination of quantitative (exposure analysis, no hazard modeling) and qualitative data to estimate potential impacts.
- Low—Scenario or hazard area is undefined; there is a degree of uncertainty regarding event probability; majority of potential impacts are qualitative.

## **Hazard Ranking**

This section provides the community specific identification of the primary hazard concerns based on identified problems, impacts and the results of the risk assessment as presented in Section 5 (Risk Assessment) of the plan. The ranking process involves an assessment of the likelihood of occurrence for each hazard, along with its potential impacts on people, property, and the economy as well as community capability and changing future climate conditions. This input supports the mitigation action development to target those hazards with highest level of concern.

As discussed in Section 5.3 (Hazard Ranking), each participating jurisdiction may have differing degrees of risk exposure and vulnerability compared to Cattaraugus as a whole. Therefore, each municipality ranked the degree of risk to each hazard as it pertains to their community. The table below summarizes the hazard risk/vulnerability rankings of potential natural hazards for the Town of Lyndon. The Town of Lyndon has reviewed the county hazard risk/vulnerability risk ranking table as well as its individual results to reflect the relative risk of the hazards of concern to the community.

During the review of the hazard/vulnerability risk ranking, the Town of Lyndon indicated the following:

• The town decided to change severe storm and severe winter storm from low to high due to recent severe storm and severe winter storm events.

**Table 9.26-12. Hazard Ranking Input** 

| Flood | Landslide | Severe Storm | Severe Winter<br>Storm | Utility Failure | Wildfire |
|-------|-----------|--------------|------------------------|-----------------|----------|
| Low   | Low       | High         | High                   | High            | Low      |

Note: The scale is based on the following hazard rankings as established in Section 5.3.

# **Critical Facilities**

New York Department of Environmental Conservation (DEC) Statute 6 CRR-NY 502.4 sets forth floodplain management criteria for State projects located in flood hazard areas. The law states that no such projects related to critical facilities shall be undertaken in a Special Flood Hazard Area (SFHA) unless constructed according to specific mitigation specifications, including being raised 2' above the Base Flood Elevation (BFE). This statute is outlined at <a href="http://tinyurl.com/6-CRR-NY-502-4">http://tinyurl.com/6-CRR-NY-502-4</a>. While all vulnerabilities should be assessed and documented, the State places a high priority on exposure to flooding. Critical facilities located in an SFHA, or having ever sustained previous flooding, must be protected to the 500-year flood event, or worst damage scenario. For those

<sup>\*</sup>The town changed the initial ranking of this hazard based on event history, experience, and feedback

that do not meet this criterion, the jurisdiction must identify an action to achieve this level of protection (NYS DHSES 2017).

The table below identifies critical facilities in the community located in the 1-percent annual chance floodplain and presents Hazards United States (HAZUS) – Multi-Hazards (MH) estimates of the damage and loss of use to critical facilities as a result of a 1-percent annual chance flood event.

Table 9.26-13. Potential Flood Losses to Critical Facilities

|      |                 | Exposure | Addressed by    |
|------|-----------------|----------|-----------------|
| Name | Туре            | 1% Event | Proposed Action |
|      | None identified |          |                 |

Source: Cattaraugus County, 2020

#### **Identified Issues**

The municipality has identified the following vulnerabilities within their community:

- Flooding along Livingston Road
- Reoccurring flooding along Porter Road and Town Line Road
- Outdated town FIRMs
- The Town of Lyndon has an outdated Flood Damage Prevention Ordinance.
- The Town of Lyndon currently does not have a temporary housing location in the event of an emergency.
- Floodplain Administration staff require additional training.
- Additional public education on wildfire risk is needed
- Poor water supply (well water) at highway shop and town offices, which is an emergency shelter
- Debris in streams in ditches throughout the town.
- 20 miles of dirt roads erode during heavy rain events.
- Poor cell service

## 9.26.7 Mitigation Strategy and Prioritization

This section discusses past mitigations actions and status, describes proposed hazard mitigation initiatives, and their prioritization.

#### **Past Mitigation Initiative Status**

The following table indicates progress on the community's mitigation strategy identified in the 2014 Plan. Actions that are carried forward as part of this plan update are included in the following subsection in its own table with prioritization. Previous actions that are now on-going programs and capabilities are indicated as such in the following table and may also be found under 'Capability Assessment' presented previously in this annex.

# **Table 9.26-14. Status of Previous Mitigation Actions**

| Project# | Project<br>Name    | Hazard(s)<br>Addressed | Responsible<br>Party | Brief Summary of the<br>Original Problem and<br>the Solution (Project) | Status<br>(In Progress,<br>Ongoing, No<br>Progress,<br>Complete) | Evaluation of Su<br>(if complete | Next Steps 1. Project to be included in 2020 HMP or Discontinue 2. If including action in the 2020 HMP, revise/reword to be more specific (as appropriate). 3. If discontinue, explain why. |
|----------|--------------------|------------------------|----------------------|--|--|----------------------------------|---|
|          |                    |                        | _                    |  |  | _                                | 7 1 1 1 2020 1 1 1 2020 7 1 001   |

| B2.27    |                    | Flood                  | Town                 | Undersized culvert pipe  | No progress  |                                  | Include in 2020 plan, Action 2020- Lyndon-001   |

## **Completed Mitigation Initiatives Not Identified in the Previous Mitigation Strategy**

The Town of Lyndon has identified the following mitigation projects/activities that have also been completed but were not identified in the previous mitigation strategy in the 2014 Plan:

None identified

## **Proposed Hazard Mitigation Initiatives for the Plan Update**

The Town of Lyndon participated in a mitigation action workshop in September 2020 and was provided the following FEMA publications to use as a resource as part of their comprehensive review of all possible activities and mitigation measures to address their hazards: FEMA 551 'Selecting Appropriate Mitigation Measures for Floodprone Structures' (March 2007) and FEMA 'Mitigation Ideas – A Resource for Reducing Risk to Natural Hazards' (January 2013).

Table 9.26-15 summarizes the comprehensive range of specific mitigation initiatives the Town of Lyndon would like to pursue in the future to reduce the effects of hazards. Some of these initiatives may be previous actions carried forward for this plan update. These initiatives are dependent upon available funding (grants and local match availability) and may be modified or omitted at any time based on the occurrence of new hazard events and changes in municipal priorities. Both the four FEMA mitigation action categories and the six CRS mitigation action categories are listed in the table below to further demonstrate the wide range of activities and mitigation measures selected.

As discussed in Section 6, 14 evaluation/prioritization criteria are used to complete the prioritization of mitigation initiatives. For each new mitigation action, a numeric rank is assigned (-1, 0, or 1) for each of the 14 evaluation criteria to assist with prioritizing your actions as 'High', 'Medium', or 'Low.' The table below summarizes the evaluation of each mitigation initiative, listed by Action Number.

Table 9.26-16 provides a summary of the prioritization of all proposed mitigation initiatives for the Plan update.

#### Critical Facility:

Yes 

◆ Critical Facility located in 1% floodplain

#### Mitigation Category:

- Local Plans and Regulations (LPR) These actions include government authorities, policies or codes that influence the way land and buildings are being developed and built.
- Structure and Infrastructure Project (SIP) These actions involve modifying existing structures and infrastructure to protect them from a hazard or remove them from a hazard area.

  This could apply to public or private structures as well as critical facilities and infrastructure. This type of action also involves projects to construct manmade structures to reduce the impact of hazards.
- Natural Systems Protection (NSP) These are actions that minimize damage and losses, and also preserve or restore the functions of natural systems.
- Education and Awareness Programs (EAP) These are actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them.

  These actions may also include participation in national programs, such as StormReady and Firewise Communities

#### CRS Category:

- Preventative Measures (PR) Government, administrative or regulatory actions, or processes that influence the way land and buildings are developed and built. Examples include planning and zoning, floodplain local laws, capital improvement programs, open space preservation, and storm water management regulations.
- Property Protection (PP) These actions include public activities to reduce hazard losses or actions that involve (1) modification of existing buildings or structures to protect them from a hazard or (2) removal of the structures from the hazard area. Examples include acquisition, elevation, relocation, structural retrofits, storm shutters, and shatter-resistant glass.
- Public Information (PI) Actions to inform and educate citizens, elected officials, and property owners about hazards and potential ways to mitigate them. Such actions include outreach projects, real estate disclosure, hazard information centers, and educational programs for school-age children and adults.
- Natural Resource Protection (NR) Actions that minimize hazard loss and also preserve or restore the functions of natural systems. These actions include sediment and erosion control, stream corridor restoration, watershed management, forest and vegetation management, and wetland restoration and preservation.
- Structural Flood Control Projects (SP) Actions that involve the construction of structures to reduce the impact of a hazard. Such structures include dams, setback levees, floodwalls, retaining walls, and safe rooms.
- Emergency Services (ES) Actions that protect people and property during and immediately following a disaster or hazard event. Services include warning systems, emergency response services, and the protection of essential facilities

| Landslide           | X   | X   |     |     | X  | X   |    |    |    | X  |  |  |
| Severe Storm        | X   | X   |     |     |    | X   |    |    | X  | X  |  |  |
| Severe Winter Storm | X   | X   |     |     |    | X   |    |    |    | X  |  |  |
| Utility Failure     | X   | X   |     |     |    | X   | X  |    |    | X  |  |  |
| Wildfire            | X   | X   |     | X   |    | X   | X  |    |    | X  |  |  |

Note: Section 6 (Mitigation Strategy) provides for an explanation of the mitigation categories.

# 9.26.9 Staff and Local Stakeholder Involvement in Annex Development

The Town of Lyndon followed the planning process described in Section 3 (Planning Process) in Volume I of this plan update. This annex was developed over the course of several months with input from many town departments, including: Highway Superintendent. The Highway Superintendent represented the community on the Cattaraugus County Hazard Mitigation Plan Planning Partnership and supported the local planning process requirements by securing input from persons with specific knowledge to enhance the plan. All departments were asked to contribute to the annex development through reviewing and contributing to the capability assessment, reporting on the status of previously identified actions, and participating in action identification and prioritization.

Additional documentation on the municipality's planning process through Planning Partnership meetings is included in Section 3 (Planning Process) and Appendix C (Meetings).

#### 9.26.10 Hazard Area Extent and Location

Hazard area extent and location maps have been generated for the Town of Lyndon that illustrates the probable areas impacted within the municipality. These maps are based on the best available data at the time of the preparation of this plan and is considered to be adequate for planning purposes. The maps have only been generated for those hazards that can be clearly identified using mapping techniques and technologies, and for which the Town of Lyndon has significant exposure. The maps are illustrated below.

Figure 9.26-1. Town of Lyndon Hazard Area Extent and Location Map 1

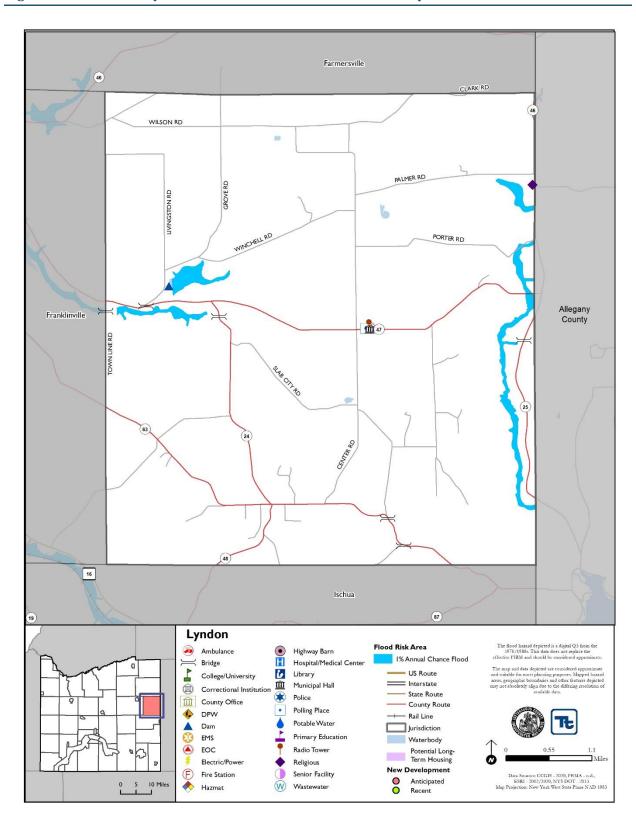

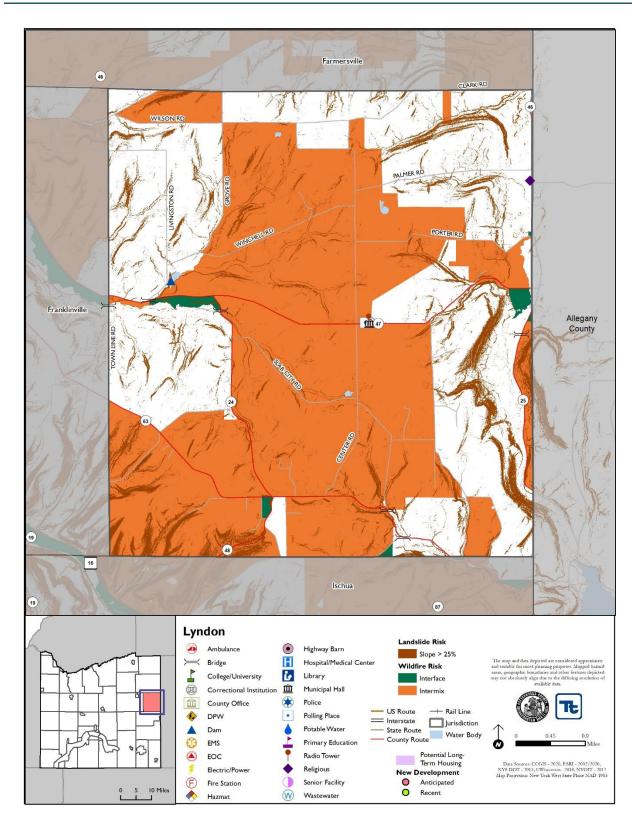

Figure 9.26-2. Town of Lyndon Hazard Area Extent and Location Map 2
