October 14, 2020

Cattaraugus County Health Department was notified of sixteen additional confirmed cases of COVID-19 residents within Cattaraugus County. The department's active positive COVID-19 caseload is now seventy eight as there are two hundred and thirty eight residents who have recovered from COVID-19.

The three hundred and thirteenth confirmed case is a female resident who resides in the southeast quadrant of the county, who has no significant travel history. She is a healthcare worker and reports being in direct contact with a positive COVID-19 person. She also reports being asymptomatic (no fever, no cough, no body aches, etc.) and was tested for COVID-19 on October 8<sup>th</sup> as a screening requirement for employees and her test results on October 13<sup>th</sup> indicated that she was positive for the virus.

The three hundred and fourteenth confirmed case is a male resident who resides in the southeast quadrant of the county, who has no significant travel history or being in direct contact with a positive COVID-19 person. He is a healthcare worker and reports being asymptomatic (no fever, no cough, no body aches, etc.). He was tested for COVID-19 on October 11<sup>th</sup> as a weekly screening requirement for employees at the facility and his test results on October 14<sup>th</sup> indicated that he was positive for the virus.

The three hundred and fifteenth confirmed case is a female resident who resides in the southwest quadrant of the county, who has no significant travel history. She reports being in direct contact with a positive COVID-19 person and who recently developed cough and congestion. She was tested for COVID-19 on October 12<sup>th</sup> and her test results on October 14<sup>th</sup> indicated that she was positive for the virus.

The three hundred and sixteenth, through the twenty third confirmed cases are eight residents of a skilled nursing home facility located in Cattaraugus County, (6 males and 2 females) who have no significant travel history. They were tested for COVID-19 on October 12<sup>th</sup> as a screening requirement for the facility and their test result indicated that they were positive for the virus.

The three hundred and twenty fourth confirmed case is a female resident who resides in the southeast quadrant of the county, who has no significant travel history or being in direct contact with a positive COVID-19 person. She reports being asymptomatic (no fever, no cough, no body aches, etc.). She was given a rapid test for COVID-19 on October 13<sup>th</sup> as part of a screening protocol and her test results indicated that she was positive for the virus.

October 14, 2020

The three hundred and twenty fifth confirmed case is a male resident who resides in the southwest quadrant of the county, who has no significant travel history. He reports being in direct contact with a positive COVID-19 person, but also reports being asymptomatic (no fever, no cough, no body aches, etc.). He was given a rapid test for COVID-19 on October 14<sup>th</sup> and his test results indicated that he was positive for the virus.

The three hundred and twenty sixth confirmed case is a male resident who resides in the southwest quadrant of the county, who has no significant travel history or being in direct contact with a positive COVID-19 person. He developed cough, congestion, chills, sore throat, shortness of breath, diarrhea, and body aches. He was tested for COVID-19 on October 10<sup>th</sup> and his test results on October 14<sup>th</sup> indicated that he was positive for the virus.

The three hundred and twenty seventh confirmed case is a female resident who resides in the southeast quadrant of the county, who has no significant travel history or being in direct contact with a positive COVID-19 person. She developed fever, cough, shortness of breath, sweats, nausea loss of taste, and body aches. She was tested for COVID-19 on October 10<sup>th</sup> and her test results on October 14<sup>th</sup> indicated that she was positive for the virus.

The three hundred and twenty eighth confirmed case is a female resident who resides in the southeast quadrant of the county, who has no significant travel history. She reports being in direct contact with a positive COVID-19 person but also reports being asymptomatic (no fever, no cough, no body aches, etc.). She was tested for COVID-19 on October 10<sup>th</sup> and her test results on October 14<sup>th</sup> indicated that she was positive for the virus.

The department has begun a thorough contact tracing investigation for those individuals that they have been in contact with and the places that they have visited.

We would like to reiterate that if any resident experience fever, cough, shortness of breath or whole body aches they should contact their health care provider (avoid going directly to an Urgent Care facility, or the Emergency Room before calling).

In addition, wash your hands often with soap and water for at least 20 seconds. This is especially important after using the bathroom, coughing, sneezing or blowing your nose.

If soap and water is not available, use an alcohol-based hand sanitizer that contains a minimum of 60% alcohol.

Avoid touching your eyes, nose and mouth, especially with unwashed hands.

Disinfect commonly touched surfaces with a cleaner that is approved by the EPA against COVID-19.

Finally, in an effort to determine the prevalence of COVID-19 in our community, any resident interested in getting tested, can register for a test at [www.cattco.org/covid-19-test](http://www.cattco.org/covid-19-test) or call 716-938-9119 or 716-938-2265.
