November 5, 2020

Cattaraugus County Health Department was notified of nine additional confirmed cases of COVID-19 residents within Cattaraugus County. The department's active positive COVID-19 caseload is now one hundred and twelve as there are three hundred and eighty eight residents who have recovered from COVID-19.

The five hundred and tenth confirmed case is a female resident who resides in the southeast quadrant of the county, who denies any significant travel history. She is a healthcare worker who denies being in direct contact with a positive COVID-19 person. She recently developed headaches and was tested for COVID-19 on November 3<sup>rd</sup> and her test results on November 4<sup>th</sup> indicated that she was positive for the virus.

The five hundred and eleventh confirmed case is a female resident who resides in the southeast quadrant of the county, who denies any significant travel history. She reports being in direct contact with a positive COVID-19 person but also reports being asymptomatic (no fever, no cough, no body aches, etc.). She was tested for COVID-19 on November 3<sup>rd</sup> as part of a screening process at the facility and her test results on November 4<sup>th</sup> indicated that she was positive for the virus.

The five hundred and twelfth confirmed case is a female resident who resides in the southeast quadrant of the county, who denies any significant travel history or being in direct contact with a positive COVID-19 person. She reports being asymptomatic (no fever, no cough, no body aches, etc.). She was given a rapid test for COVID-19 on November 3<sup>rd</sup> as part of a screening process at the facility and her test results indicated that she was positive for the virus.

The five hundred and thirteenth confirmed case is a female resident who resides in the southwest quadrant of the county, who denies any significant travel history or being in direct contact with a positive COVID-19 person. She recently developed fever, congestion, and loss of taste and smell. She was tested for COVID-19 on November 1<sup>st</sup> and her test results on November 4<sup>th</sup> indicated that she was positive for the virus.

The five hundred and fourteenth confirmed case is a male resident who resides in the southwest quadrant of the county, who denies any significant travel history. He reports being in direct contact with a positive COVID-19 person and recently developed congestion, sore throat, and loss of taste. He was tested for COVID-19 on November 4<sup>th</sup> and his test results on November 5<sup>th</sup> indicated that he was positive for the virus.

November 4, 2020

The five hundred and fifteenth confirmed case is a male resident who resides in the southwest quadrant of the county, who denies any significant travel history or being in direct contact with a positive COVID-19 person. He recently developed congestion, vomiting, diarrhea, and fatigue. He was given a rapid test for COVID-19 on November 4<sup>th</sup> and his test results indicated that he was positive for the virus.

The five hundred and sixteenth confirmed case is a female resident who resides in the southeast quadrant of the county, who denies any significant travel history. She reports being in direct contact with a positive COVID-19 person but also reports being asymptomatic (no fever, no cough, no body aches, etc.). She was given a rapid test for COVID-19 on November 5<sup>th</sup> and her test results indicated that she was positive for the virus.

The five hundred and seventeenth confirmed case is a female resident who resides in the northeast quadrant of the county, who denies any significant travel history. She reports being in direct contact with a positive COVID-19 person and recently developed fever, chills and body aches. She was tested for COVID 19 on October 31<sup>st</sup> and her test results on November 4<sup>th</sup> indicated that she was positive for the virus.

The five hundred and eighteenth confirmed case is a female resident who resides in the southeast quadrant of the county, who denies any significant travel history. She reports being in direct contact with a positive COVID-19 person but reports being asymptomatic (no fever, no cough, no body aches etc.). She was tested for COVID 19 on November 2<sup>nd</sup> and her test results on November 4<sup>th</sup> indicated that she was positive for the virus.

The department has begun a thorough contact tracing investigation for those individuals that they have been in contact with and the places that they have visited.

We would like to reiterate that if any resident experience fever, cough, shortness of breath or whole body aches they should contact their health care provider (avoid going directly to an Urgent Care facility, or the Emergency Room before calling).

In addition, wash your hands often with soap and water for at least 20 seconds. This is especially important after using the bathroom, coughing, sneezing or blowing your nose.

If soap and water is not available, use an alcohol-based hand sanitizer that contains a minimum of 60% alcohol.

Avoid touching your eyes, nose and mouth, especially with unwashed hands.

Disinfect commonly touched surfaces with a cleaner that is approved by the EPA against COVID-19.

Finally, in an effort to determine the prevalence of COVID-19 in our community, any resident interested in getting tested, can register for a test at [www.cattco.org/covid-19-test](http://www.cattco.org/covid-19-test) or call 716-938-9119 or 716-938-2265.
